OUR MISSION

A protocol that facilitates cost-efficient and secure atomic transactions by utilizing a wide range of protocols and performing argument validation and execution verification. **Blaster token** was created by a team of 3 cryptocurrency enthusiasts whom, like many other people, have been rugged / dumped on in other projects. Our mission is to create something which gives satisfaction to holders by **keeping everything transparent**, our team have planned the tokenomics in a way which makes **rug pulling practically impossible**. Development is done before hand which shows how committed our team is towards this project, our mission is to follow in the footsteps of leading crypto marketing platforms and **create a solid community**, by achieving this we will have another great use case for our coin, which will help us in reducing the quantity of coins from the market by **manual buy back and burns**. With the current **Blaster wallet beta**, we will be looking to test for bugs and functionality, we will also look for ways to improve our UI for the best trading experience. Our Swap will continue to evolve as we test our beta and the updates will be added with the full launch of the **Decentralised exchange**.

BLASTER TOKEN VISION

Blaster Token is the coin to fill the void between meme coins and alt coins. As we observed, a The recent increase in tokens with different reward types is remarkable, Functional swap, instrument cluster and Dapp is already running, we have passive rewards and much more in the pipeline. Owners can have peace of mind Knowing that the team is on the right track, earn passive income just by holding the Blaster Tokens.

ANTI DUMP

EXTRA SELL FEE:

\$BLT sales are restricted to less than 0.5% of the total supply + extra selling fee is applied to all sales to reduce arbitrage, swing-trading and whales dumps.

ANTI WHALE:

The **max supply** a wallet can hold is capped at **0.5%** of the total supply which helps counter **dumping from big investors** also known as whales.

HOW DOES IT WORK?

On Binance Smart Chain (BSC), \$BLASTER Token is a next-generation mirror token that works and offers rewards to optimize user profits both now and in the future. 3% of each transaction. This is automatically transferred to your wallet every 60 minutes.

BUY TAX & SELL TAX
